generator

voltage  
measurement

different  
accu charger

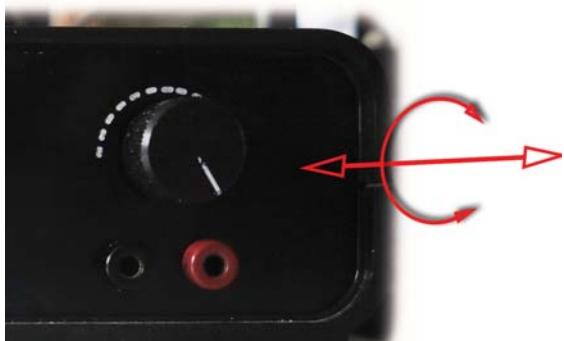

over current protection

PWM III

## encoder and its functions

### short press

- confirm selection
- chose fine/coarse voltage setting

### long press

- return to main menu

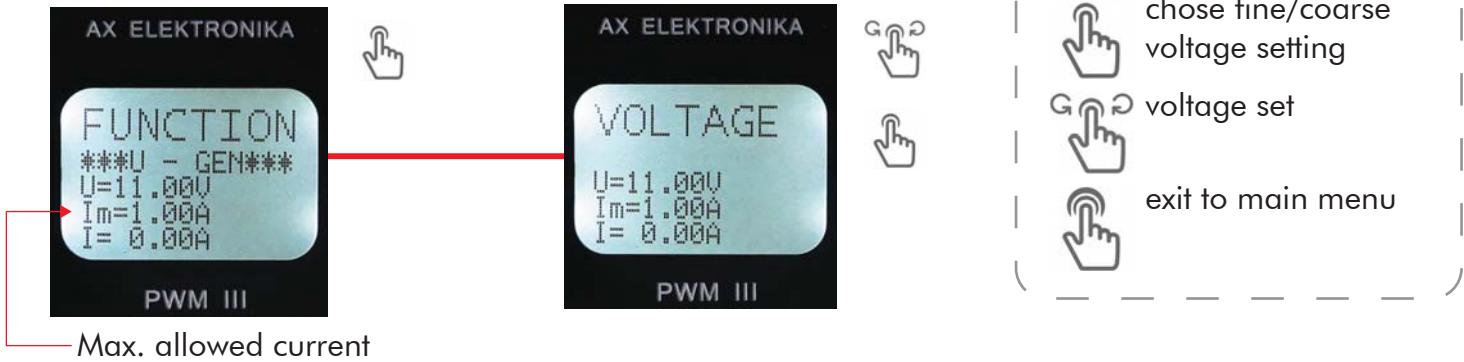

### spin left or right

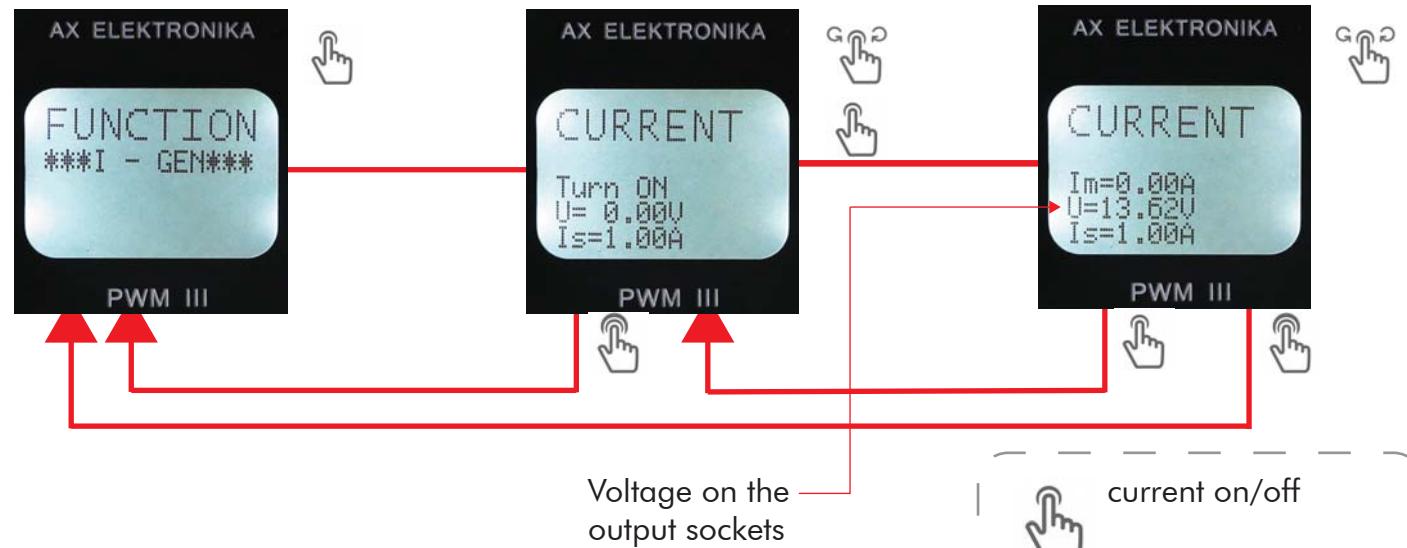

- chose menu selection
- set value of U/I and other parameters

# Quick manual

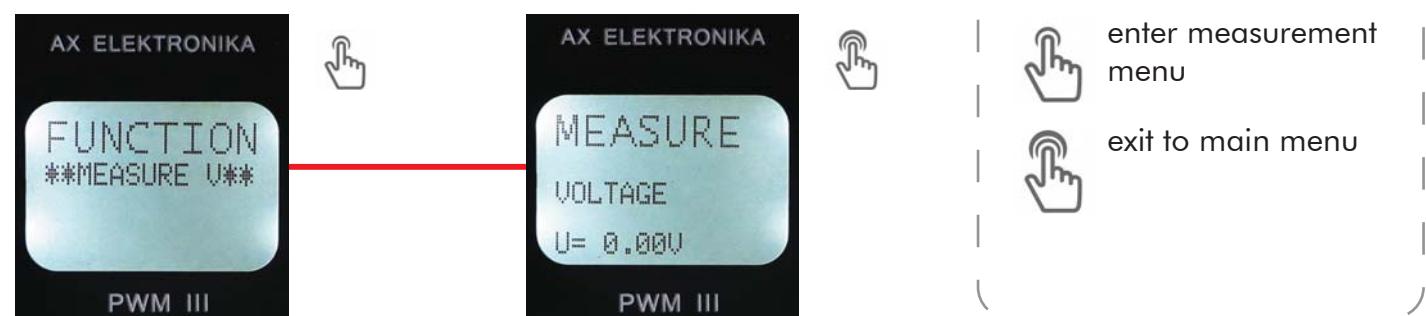

## voltage generator

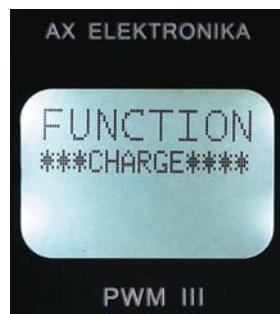

## current generator

## voltage measurements

# different accu charger

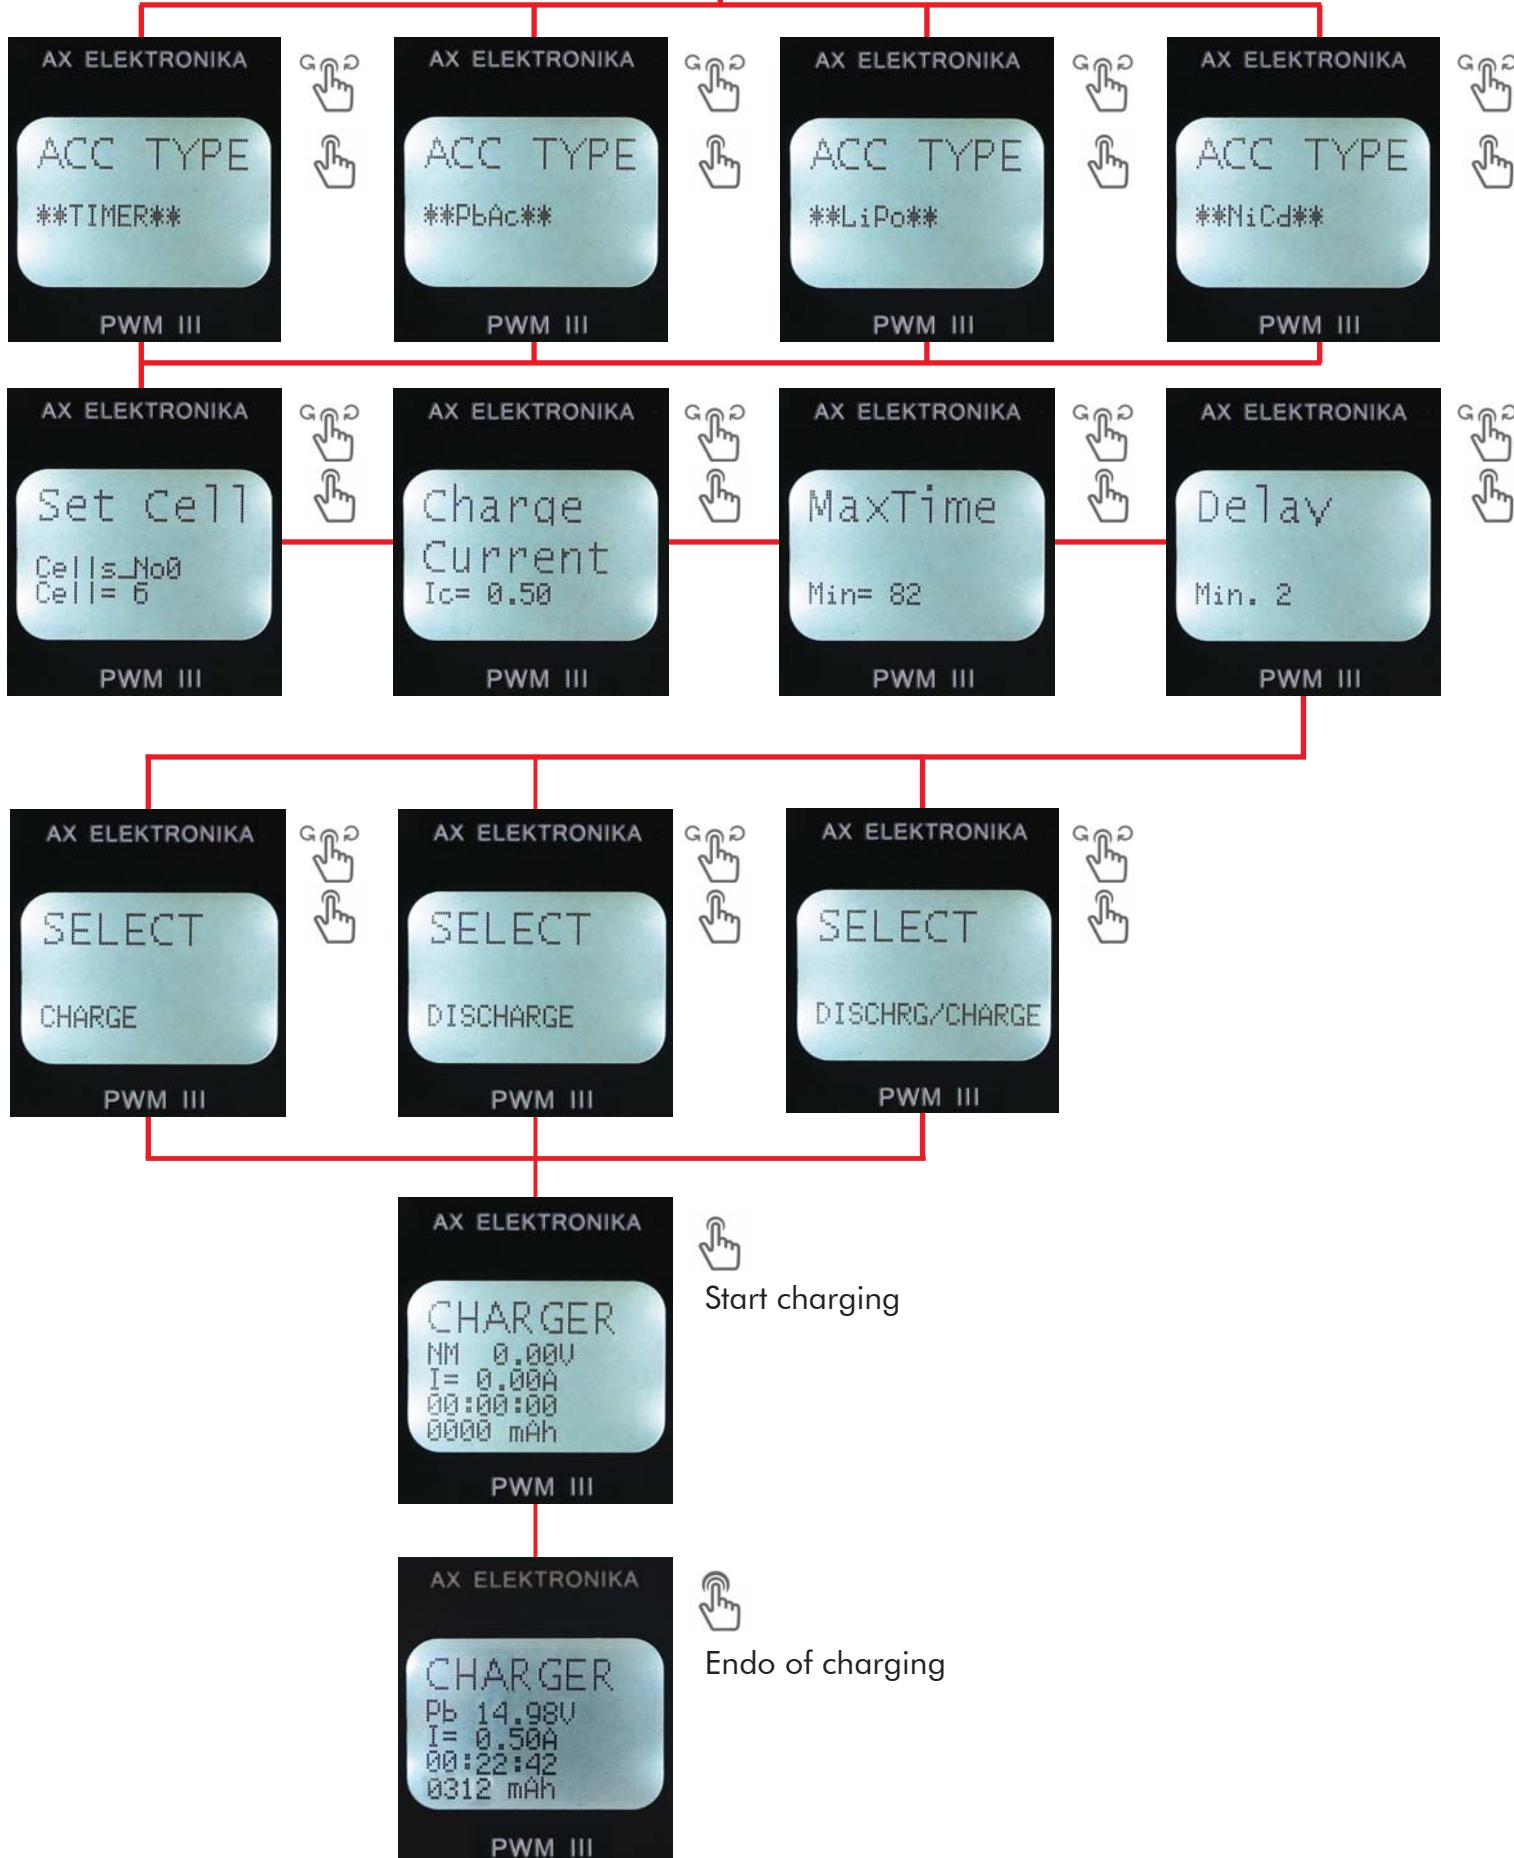

confirm selection

choose

exit to main menu

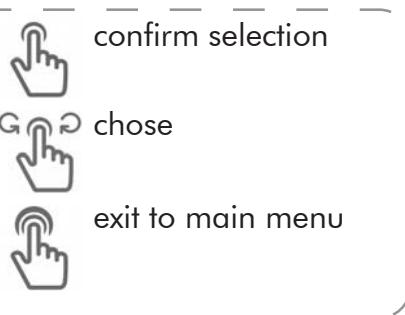

# over current protection

Set max.  
current

Set timedelay to activate current protection

## Technical characteristics:

Power supply 230V  
Output DC voltage: 0-20V  
Output current: up to 2A

AX elektronika d.o.o.
